Bio-Recovery at work for you.

“PROVIDING **PEACE OF MIND** IN TROUBLING TIMES”

At any hour of any day a traumatic incident may strike you, your business or your loved ones.

Bio-Gone Services hopes to become your provider of choice when the unthinkable occurs.

The need for a **Bio-Gone** technician may be due to the effects of an unattended death, police situation, suicide, homicide, assault, refuse home (packrat) or other scenario resulting in the possible exposure to blood, body fluids or other potentially infectious material (feces, animal droppings etc.) These situations may arise within any given property such as a residence, a vehicle or other place where people may have gathered (commercial, industrial or residential).

Bio-Gone Services will provide skilled, certified technicians specialized in the clean up and removal of these potentially harmful wastes.

A man was recently rescued from this Olympics Street home after being trapped by piles of debris in the house. Washington State BP 2008

Bio-Recovery at work for your property:

We realize that after an incident the assumption may be to take the task in hand to minimize the trauma to your family or your daily life. However, it has been stated that prolonged exposure to the effects of a traumatic event can increase an individual's risk of psychological difficulties and potentially post traumatic stress. **Bio-Gone** technicians stand ready to minimize your exposure to these life altering moments by placing discreet, compassionate and caring technicians at your side to handle the clean-up of an unbelievable mess.

Bio-Recovery at work for your business:

As an employer OSHA guideline 29 CFR 1910 states that you may not expect an employee to clean and remove potentially harmful waste unless they have been properly trained, equipped and immunized. Allow **Bio-Gone** technicians to safely and effectively remove waste which could potentially hinder further productivity. **Bio-Gone Services** understands the balance between worker safety and loss of production. We will complete the job quietly and in a timely manner as to minimize the trauma to workers, customers and the bottom line.

Do not hesitate to contact **Bio-Gone Services** in your time of need, again we are here to serve you when the unimaginable occurs.

Why should I call **Bio-Gone**?
